

No Fuel Additive Needed!

Leverages new Fuel Life Technology, our proprietary nanopore reactive molecular sieve

*Fuel Life removes the compounds in the fuel that promote fuel decay
Once removed the fuel can no longer decay under normal conditions*

Neutralizes the chemical reaction that starts fuel decay

Removes water bound to ethanol, greatly reducing corrosion and eliminating phase separation

Can hold 21% its weight in water

Good for 10 tanks of fuel or 1 year

Non-Toxic / Non-Hazardous Disposal

Nothing is released into the fuel

ASTM D525 Tested!

Simple to use!

**USA and World
Wide PATENT
PENDING**
