Horry County Public Works

4401 Privetts Road

Conway, SC 29526 Office: (843) 915-5410

Before adding Diesel Mechanic In A Bottle to our fuel supply on December 7th, 2010, we would have to pull our 09' C8500 dump truck over and perform a 15 minute exhaust regeneration (burn cycle) multiple times a day to clean the exhaust particulate filter. This would waste over 7 hours a month and countless gallons of fuel.

We now add Diesel MIB at every fill up and only perform one exhaust regeneration cycle per month! We rarely find any other product for our fleet that does exactly what the label says! The time savings, as well as the repair costs to the particulate filters are saving us thousands just on this vehicle.

Our whole fleet of trucks is now running Diesel MIB and we are seeing on average, a 1 MPG increase in fuel economy throughout our fleet. With the recent spike in oil prices we will save thousands of dollars this year in fuel.

Thank you B3C Fuel Solutions for this terrific product!
