

FUEL SYSTEM FIX / CLEANER

FIX POOR / NON-RUNNING ENGINES

**JUST POUR IN
TANK & IT WORKS!**

- Synthetic fuel additive cleans the fuel system so that it starts efficiently and operates in top condition
- Works in ALL gasoline engines to remove varnish, carbon deposits and water in the fuel system
- On machine carburetor cleaning
- Dual lubricants condition rubber and plastic components and rejuvenates rubber gaskets and seals that may have dried out from ethanol
- Revitalizes old, decayed fuel by breaking down carbon deposits
- Safely dissolves varnish / shellac to clean internal engine components
- Cleanses power-robbing carbon deposits from engine's internal components
- Removes water that causes corrosion and poor running
- Octane Booster replaces lost octane
